

**PPE Care Taken Seriously**

# Care and Maintenance Program

for Morning Pride®, Ranger®, Ultramotion® by Honeywell Structural Gear

BECAUSE  
WHAT YOU DO  
MATTERS

Your gear keeps you safe in extreme conditions.

Honeywell First Responder Services Care & Maintenance Program helps you maintain the level of protection of your gear, maximizing its performance, safety and longevity.

We understand the risks associated with improper maintenance, inadequate care, and wear and tear of your turnout gear. We are fully committed to providing the highest level of quality and support in order to keep you safe.

First Responder Services

# Care and Maintenance Program

for Morning Pride®, Ranger®, Ultramotion® by Honeywell Structural Gear

Honeywell First Responder Services is proud to offer automatic lifetime warranty\* on all its Morning Pride, Ranger, and Ultramotion branded lines of protective clothing. At the same time, we realize that firefighting pushes your gear to the limit and that you want to get the most out of your investment while maintaining safety performance through the life of the garment.

\*Warranty does not cover normal wear, or repairs due to normal wear.

## Day-1 Quality and Safety Performance Is Yours with HFRS Maintenance Program

The HFRS maintenance program provides a fixed-rate maintenance service package on Honeywell personal protective equipment. Our maintenance program allows your department to have NFPA 1851-required annual maintenance service at a fixed rate for up to 10 years from the date of manufacture.

## FIXED-RATE MAINTENANCE PROGRAM

**\$190.00 per set annually**

Free ground shipping both ways within the continental United States.

### Service Includes:

- Annual advanced cleaning and advanced inspection of outer shell, moisture barrier and thermal barrier as required by NFPA 1851 – 2008 edition.

### Repairs Include:

- Re-stitching of seams, trim, and Velcro®
- Hardware replacement including D-Rings, hooks, snaps, suspender buttons

Extra charges may apply if required work exceeds scope of the standard maintenance program or if PPE is older than 12 months.

Other extra charges: specialized cleaning – e.g. fuel, tar, oil, paint, biological, etc.

- Trim replacement / repair
- Patches on any layer
- Chin band replacement
- Knee pad replacement / repair
- Coat or pant cuff replacement / repair
- Pocket replacement / repair
- Letter, number and nameplate replacement
- Zipper replacement
- Entire component replacement
- Velcro® replacement
- Any type of alteration

## Why Choose Our Program...

- 10 business days turnaround from receipt of PPE
- NFPA 1851-compliant required annual service
- NFPA 1851-compliant recordkeeping
- Documentation of annual advanced cleaning, annual advanced inspection, and all repair(s) provided in Advanced Protective Tracking (APT) format at: [www.hfrservices.com](http://www.hfrservices.com)
- All parts replaced with original components

## How To Enroll

- Go to [www.hfrservices.com](http://www.hfrservices.com)
- Call one of our service representatives at 800-688-6148
- Contact your local distributor

Do it Fast.  
Do It Right.

Extend Your  
PPE's Life,  
Performance  
and Safety.

A Wise  
Investment

# We Make It Easy for You

## **NFPA Recognizes the Importance of Proper Working Gear**

### **NFPA 1851, 2008 Edition Requirements**

The 2008 edition of NFPA 1851 Standard on Selection, Care and Maintenance of Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting is now in effect. Whether you were familiar with the earlier 2001 edition care document or not, you will need to familiarize yourself with this 2008 edition document. While it may initially appear to impose significant new requirements, please bear in mind that Honeywell offers extensive support materials and services, at no or low charge, to assist our customers in complying with and understanding the document.

## **What Does NFPA 1851 Specifically Impose?**

- Routine cleaning and inspection after every soiling/use
- Advanced cleaning and inspection at least annually (very precise definitions apply of what operations/testing are required)
- Detailed record keeping
- Specialized cleaning when required
- Manufacturer training on all NFPA 1851 issues or training by an independent service provider (ISP) trained and approved by the manufacturer
- Mandatory retirement of all 10-year-old or older PPE (personal protective equipment, which includes coats, pants, suspenders, helmets, gloves, hoods and boots)
- Advanced cleaning, advanced inspection, and all repairs must be performed by Honeywell First Responder Services (HFRS) or an HFRS-recognized independent service provider (ISP).

# Complete Care Solutions

## **Honeywell Dayton Facility – Center of Excellence for Total Care PPE**

Our Dayton manufacturing plant features a state-of-the-art PPE cleaning & care facility and training center for training and supporting our nationwide network of partner independent service providers (ISPs). We offer training to our dealers, and customers, and even approve new ISPs.

## **Cleaning, Maintenance and Repair**

- NFPA 1971 Protective Ensembles for Structural and Proximity Fire Fighting (clothing, boots, helmets, hoods and gloves) according to NFPA 1851
- NFPA 1999 – Protective Clothing for Emergency Medical Operations
- NFPA 1992 – Liquid Splash-protective Ensembles and Clothing for Hazardous Materials Emergencies
- NFPA 1951 – Protective Ensembles for Technical Rescue Incidents
- NFPA 1977 – Protective Clothing and Equipment for Wildland Fire Fighting
- NFPA 1975 – Station/Work Uniforms for Fire and Emergency Services

# The Heart of Your Protective Garment Is Inside

- Products multi-certified to any of the Standards and/or NFPA 1971 – Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting, noted above.
- Specialized cleaning, where practical, will also be quoted per event. It is consistent with how essentially all other care providers handle exposures of the following types:
  - Paint
  - Oil
  - Fuel
  - Wax
  - Hydraulic fluid
  - Tire-fire residue
  - Biohazards
  - Any other exposure requiring MSDS sheet consultations

Advanced cleaning and repair for clothing and equipment to various other NFPA standards which NFPA 1851 does not cover (but we endeavor to follow general NFPA 1851 advanced clothing and inspection protocols).

Your moisture barrier is embedded within the layers of your protective garment, and visual inspections cannot normally reveal pin holes and seam problems. Only a hydrostatic water pressure test can do this.

The Honeywell First Responder Services ISO 17025-accredited testing laboratory has developed a specialized hydrostatic water-pressure test stand to facilitate the now required post-three-years-of-service moisture barrier hydrostatic water pressure test.

## **The Honeywell hydrostatic water-pressure test stand offers our customers and ISPs important advantages:**

- Dual pressure regulators pre-set to balance each other to keep the testing pressure at the correct 1 psi (+.1 psi tolerance) during the test
- Detailed operator instruction manual
- Stand labeling to minimize common errors
- Slim-profile arm to facilitate tubular garment area testing (arms, legs, etc.)

- Self-draining garment protection tray to minimize garment water contact during testing

The 15-second test can be used in lieu of the less strenuous, less reliable 3-minute puddle test at any point in the life of a Morning Pride, Ranger, and Ultramotion branded line of protective clothing. The hydrostatic water pressure test is a better test of moisture-barrier condition and is done in half the time of the puddle test. Each set is tested at a minimum of 6 spots for a total time saving of almost 18 minutes per set. The test stand is available for purchase or daily rent. Purchased test stands will be calibrated and refurbished annually for a fee that includes a loaner stand during the rework period, if requested (to keep ISPs and fire departments in service during their test stand recalibration). Loaner test stands are also available during non-scheduled repairs at no charge, upon request. Freight both ways is customer responsibility on all stands, including loaners.
